

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. J. Michael Buchanan on January 7, 2011.

The application has been amended as follows:

Claim 2, line 2, deleted the first "about".

Claim 5, line 1, deleted the first "about".

Claim 33, line 1, replaced "in" with - - an - -.

Claims 1-3, 5-8, 10, 12-20, 22, 24-26 and 32-34 are allowable. Claims 9, 11, 21, 23 and 27, previously withdrawn from consideration as a result of a restriction requirement, include all the limitations of an allowable claim. Pursuant to the procedures set forth in MPEP § 821.04(a), **the restriction requirement, as set forth in the Office action mailed on March 4, 2008, is hereby withdrawn** and claims 9, 11, 21, 23 and 27 are hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement, applicant(s) are advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Claims 1-3, 5-27 and 32-34 are allowed. The following is an examiner's statement of reasons for allowance: the prior art of record does not teach or suggest a method for compression molding of poly(arylene ether) powder comprising introducing a powder comprising unheated poly(arylene ether) powder to compaction equipment comprising a compression mold and subjecting the powder in the mold to a pressure of 1 to 50 tons per square centimeter at a temperature of 0 to 65 °C to produce an article having a density of about 0.6 to about 1.2 grams per cubic centimeter, a compressive strength of greater than or equal to about 25 kg, and a diameter to height ratio of 1.6 to 2.1, in combination with the other features instantly claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JEFFREY WOLLSCHLAGER whose telephone number is (571)272-8937. The examiner can normally be reached on Monday - Thursday 6:45 - 4:15, alternating Fridays.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Johnson can be reached on 571-272-1176. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
